Art Unit: 1651

1. Receipt is acknowledged of the amendment filed October 07, 2002.

2. Claims 15-36 are now pending in this application.

Applicant has cancelled Claims 1-14 and 37 with the right to file divisional to the non-elected cancelled claims.

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The **enablement** as well as the **written description** of the instant specification lack support for the claimed ingredients.

**The specification lacks adequate written description** for the claimed inventions in view of the following points in accordance with the written description requirements of 35 U.S.C. 112:

The description must clearly allow persons of ordinary skill in the art to recognize what is claimed with respect to the expression "pharmaceutically-active extract". Thus, an applicant must comply with the written description requirement "by describing the invention, with all its claimed limitations, not that which makes it obvious," and by using "such descriptive means as words, structures, figures, diagrams, formulas, etc., that set forth the claimed invention." Lockwood, 107 F.3d at 1572, 41 USPQ2d at 1966.

An adequate written description of the ingredients requires more than a mere statement that it is part of the invention and reference to a potential method for isolating it.

The description requirement of the patent statute requires a description of an invention, not an indication of a result that one might achieve if one made that invention. See *In re Wilder*, 736 F.2d 1516, 1521, 222 USPQ 369, 372- 73 (Fed. Cir. 1984) Accordingly, naming a type of material generally known to exist, **in the absence of knowledge as to what that material consists of, that is the "extract", is not a description of that material.**

Thus, Claims 15-22, 25-26, 28-29, 31-32, 34 and 36 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The broad generic claim lacks sufficient description to inform a skilled artisan that applicant was in possession of the claimed invention at the time of filing since the specification lacks a complete structure or identifying characteristics for the claimed extract commensurate in scope with the specification, thus the description requirement has not been satisfied.

Claims 15-22, 25-26, 28-29, 31-32, 34 and 36 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for example claim 23, does not reasonably provide enablement for the exceptionally broad claimed inventions. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the invention commensurate in scope with these claims.

4. Claim 24 is objected to under 37 CFR 1.75 as being a substantial duplicate of claim 23. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k).
